

兔抗 LHB 多克隆抗体

中文名称：兔抗 LHB 多克隆抗体

英文名称：Anti-LHB rabbit polyclonal antibody

别 名：CGB4, hLHB, LSH-B

相关类别：一抗

储 存：冷冻（-20℃）

宿 主：Rabbit

抗 原：LHB

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene is a member of the glycoprotein hormone beta chain family and encodes the beta subunit of luteinizing hormone (LH). Glycoprotein hormones are heterodimers consisting of a common alpha subunit and an unique beta subunit which confers biological specificity. LH is expressed in the pituitary gland and promotes spermatogenesis and ovulation by stimulating the testes and ovaries to synthesize steroids. The genes for the beta chains of chorionic gonadotropin and for luteinizing hormone are contiguous on chromosome 19q13.3. Mutations in this gene are associated with hypogonadism which is characterized by infertility and pseudohermaphroditism.
Applications:	ELISA, WB

Name of antibody:	LHB
Immunogen:	Synthetic peptide of human LHB
Full name:	Luteinizing hormone beta polypeptide
Synonyms :	CGB4, hLHB, LSH-B
SwissProt:	P01229
ELISA Recommended dilution:	1000-5000
WB Predicted band size:	15 kDa
WB Positive control:	293T cells and Human fetal brain tissue
WB Recommended dilution:	500-2000
